

TALK SERIES- GLASS

Glass is one of the most common materials in construction and yet its properties and innovations remain relatively unknown. A product presentation was held for the students of Tulsiramji Gaikwad-Patil College of Architecture. Adnan and Arshad Musa of the Fancy Frame Glass Stores, Gandhibagh have been involved in the field for over a decade now. They were invited to talk about the various types of glass available in the market, their application and the new breakthroughs. The duo also demonstrated the thermal performance of different types of glass.
